Note: Minimum of 8 participants required for private classes for organizations. Classes are considered "Full" at 16 participants.

Effective March 28, 2009

Advantages of enrolling 8 or more participants from your organization:

1. You will have a private class for just your organization
2. Your private Design or Facilitation Certificate class will include the *Learn How To Learn Online* pre-requisite course at no additional charge.
3. You may decide to use your own synchronous training platform (certain restrictions and additional costs may apply)
4. We can create an accelerated schedule that meets the needs of your participants
5. You can include participants that represent your manager, expert, trainer, and designer populations. If you include a variety of people, there is a better chance of synchronous training being adopted in your organization.
6. We can customize content for your industry and/or company to make the program more relevant. (Customization charges may apply). Some customization may result in IACET CEUs not being awarded.
